ImpactFinance

AIM

The ImpactFinance project is aimed at increasing awareness and application of the synergy between sustainability and financial literacy of youth, in order to solve societal wellness challenges. This project will not only involve learning and understanding of sustainable personal finance, but also practicing and sharing what is taught.

PROJECT RESULTS

PR1: Handbook of sustainable financial literacy

PR2: Set of Education Materials

PR3: E-learning platform

Newsletter

September, 2025

The ImpactFinance partnership proudly presents its new set of educational materials on sustainable personal finance. Co-created through hackathons and expert input, these open-access tools are designed to help young people make responsible financial choices and are freely available on the ImpactFinance website.

C2-LEARNING ACTIVITY AND 3rd TPM

In April 2025, the project held its C2 Learning, Teaching and Training Activity in Thessaloniki, Greece, where the hackathon-winning teams from all partner countries gathered. Over three days, participants tested and fine-tuned the educational materials, ensuring they are engaging, practical, and relevant to a younger audience.

At the same time, the partners met for the 3rd Transnational Project Meeting, also in Greece, to review progress and align on the next steps.
